

# IRES 2017 Poster Exhibition

## Applications and Case Studies

111	The Solar Mobility Hub: A Case Study on the Use of Solar Photovoltaics to Charge E-Bikes	Rishabh Ghotge, Solar Energy Application Centre, Netherlands
113	Operational Experiences with Advanced Vanadium Redox Flow Batteries in the Megawatt Range	Andreas Luczak & Xuan Katheder, Kiel University of Applied Science, Germany
120	BIG Solar Graz - Results of A Techno-Economic Feasibility Study	Patrick Reiter, S.O.L.I.D. Gesellschaft für Solarinstallation und Design mbH
131	PROVISS – A Simulation Tool for Assessment of Residential PV Storage Systems	Michael Hinterstocker, Forschungsgesellschaft für Energiewirtschaft mbH, Germany
133	Impact of Dispatchable Units on the Electrical Autarky of Future Municipal Energy Supply Systems	Thomas Bexten, IKDG, RWTH Aachen University, Germany
142	Electricity Storage Market Trading	Anthony Price, Swanbarton Limited
149	Dynamic Modeling Studies of a Large Acale Seasonal Thermal Energy Storage System in China	Zijiang Yang, EDF R&D China Center, China
165	Design of a Packed Bed High Temperature Thermal Energy Storage System: A Methodical Approach	Eva Faust, enolcon gmbh, Germany
166	Experimental Comparison of Two Heat Exchanger Concepts for Latent Heat Storage Applications	Valeria Palomba, University of Messina-Department of Engineering, Italy
168	Minimizing Storage Costs: Simple and Effective Methods to Match PV with Grid Load, Including Shift of Holiday Period	Prof. Stefan Krauter, University of Paderborn, Germany
172	Application of Phase Change Materials to Increase the Efficiency of Photovoltaic Modules	Torsten Klemm, Fraunhofer IFAM, Branch Lab Dresden, Germany
196	Inverse Modelling of A District Heating Facility with Seasonal Thermal Energy Storage	Karl Woldum Tordrup, VIA University College, Denmark
203	A Novel Salt Storage Method for Extending the Operation Hours of Thermal Oil Based Parabolic Through Plants Retrofitted With Molten Salt Power Tower	Carlos Andrés Rendón Díaz, FH Aachen, Germany
207	Limiting The Public Cost of Stationary Battery Deployment by Combining Applications	Annegret Stephan, ETH Zurich / Group for Sustainability and Technology, Switzerland
223	Interdisciplinary Review of Medium-deep Aquifer Thermal Energy Storage in North Germany	Nikolai Strodel, Leuphana University, Germany
229	The Technology Perspective of Compressed Air Energy Storage in the Germany Energy System	Cynthia Boysen, ZNES, Flensburg University of Applied Sciences, Germany
239	Effect of Nucleating Agents on Heat Storage Properties of Salt Hydrates	Forough Orak, University Bayreuth, Germany
242	Mitigation of Large Power Spills by an Energy Storage Device in a Stand Alone Energy System	Debarati Bhaumik, Centrum Wiskunde & Informatica, Netherlands
249	A Framework for Dynamic Simulation and Model Predictive Control of Hybrid Energy Systems	Gerald Schweiger, AEE INTEC / TU Graz, Austria
254	Energy Storage and Integrated Energy Approach for District Heating Systems	Tobias Schrag, Technische Hochschule Ingolstadt, Germany
255	Analytical Assessment of Renewable Energy Sources and Energy Storage Concerning their Merits for the Electric Power System	Stefan Henninger, University of Erlangen-Nuremberg, Germany
262	Size Optimization of a Microgrid with Large Penetration of PV and Battery Energy Storage System	Michalis Florides, University of Cyprus, Cyprus
271	An Adaptive Hybrid-Energy-Source Home Water Heating Unit	Jalal Baghdadchi, Alfred University, USA
272	Battery Energy Storage Models for Residential Applications Validated with Smart Meter Data	Christoph Stegner, ZAE Bayern, Germany
302	Techno-Economic Study for Feasability of Solar Power Plant in Algeria	Sofiane Bouaichaoui, Centre de Développement des Energies renouvelables (CDER) , Algerie
305	Key Tasks and Key Technologies for the German Energy Transition	Bert Droste-Franke, European Academy of Technology and Innovation Assessment GmbH
313	Experimental Setup For High Temperature Thermal Cycling of Solid Particle Materials as TES and HTF	Alejandro Calderon Diaz, Universidad de Barcelona, Spain
316	GIS Analysis of the Gas Grid to Identify Integrative Sites for Feeding In Green Hydrogen	Thomas Nietsch, ABO Wind, Germany
318	Forecast of Infrequent Wind Power Ramps Based on Data Sampling Strategy	Yuka Takahashi, Waseda University Tokyo, Japan
323	Synthesizing Residential Swiss Load Profiles by Behavior Simulation	Noah Pflugradt, Bern University of Applied Sciences, Switzerland
329	Batteries, Optimal-Sized for PV Self-Consumption: Usage for peak Shaving	Wouter Schram, Utrecht University, The Netherlands

## Batteries

123	Home Storage Performance Assessment of Building-Integrated Battery Storage Systems Based on Different Measurement Procedures	Joaquín Klee Barillas, ZSW Baden-Württemberg, Germany
-----	--	---

150	Impact of Battery & Water Storage on Transition to Integrated 100% RE Power System for KSA	Upeksha Caldera, Lappeenranta University of Technology, Finland
178	Has the Vanadium Flow Battery Potential in Home Storage Applications? - A Techno-Economic Analysis	Petra Dotzauer, ZAE Bayern, Germany
194	Techno-Economical Analysis of Energy Storage Systems for the Provision of Frequency Containment Reserve under Consideration of Battery Aging	Christian Bucher, RES Deutschland GmbH, Germany
212	Battery Friendly Smart Home Energy Management with Wireless Bidirectional EV-Charging	Gerd Liebig, NEXT ENERGY · EWE Research Centre for Energy Technology e.V., Germany
216	A Perspective on Aluminium-ion Batteries	Chun-Tsung Hsu, Industrial Technology Research Institute, Taiwan, Republic of China
233	Systematic Experimental Pulse Test Investigation for Parameter Identification of an Equivalent Circuit Based Lithium-ion Battery Model	Michael Böttiger, TU Dresden, Germany
244	Power Fluctuations in Solar-Storage Clusters: Spatial Correlation and Battery Response Times	James Barry, Karlsruhe Institute of Technology, Germany
280	Investigation, Modeling and Simulation of Battery Systems for Home Storage Applications	Jonas Schlund, FAU Erlangen-Nürnberg, Germany
319	Redox-Flow-Battery Double Used - ABO Winds Integrated Energy Concept	Jörg Wirtz, ABO Wind AG, Germany
<b>Electric Energy Storage</b>		
209	Integration of Molten Salt Energy Storage into Steam Power Plants	Marc Schwarzenbart, Solar-Institut Jülich, FH Aachen, Germany
248	Hybrid Thermo-Chemical Network and Storage	Martin Buchholz, Technische Universität Berlin, Germany
253	Flexibility Provision with Photovoltaic Battery Energy Storage - Modelling and Simulation Approach	Ali Tayyebi Khameneh, Austrian Institute of Technology GmbH, Austria
277	Impact Of A Comprehensive Heat/Electrical Load Demand Model on the Behavior of A Storage	Simon Ruben Drauz, Fraunhofer IWES, Germany
282	State of Energy Balancing of a Hybrid BESS for the Provision of FCR in Germany	Hendrik Axelsen, PGS, RWTH Aachen, Germany
286	Compact Setup of A Novel Energy Storage System Based on Liquid Organic Hydrogen Carriers (LOHC)	Johannes Geiling, Fraunhofer IISB, Germany
290	Investigation and Benchmark Test of Energy Management Concepts for Autonomous PV-hybrid Systems with Battery and Hydrogen Storage Path	Thilo Bocklisch, TU Dresden, Germany
291	Comparison of Particle Swarm and Genetic Algorithm Based Design Algorithms for PV-Hybrid Systems with Battery and Hydrogen Storage Path	Martin Paulitschke, TU Dresden, Germany
303	Intelligent Use of Energy in Small and Medium-Sized Industry	Richard Oechsner, Fraunhofer IISB, Germany
320	Commercialization and Deployment of Advanced Flow Batteries	Matthew Clarke, Gildemeister Energy Storage GmbH, Germany
331	Stability Limits of Tin-Based Electrocatalyst Supports	Simon Geiger, Max-Planck-Institut für Eisenforschung, Germany
332	Electricity Generation and Storage by Hot-Spots on the Seabed	Guenter Elsbett, Guenter Elsbett Technologie, Germany
<b>Energy Supply System</b>		
114	Cascading Effects And The Need To Adapt Critical Energy Infrastructures To Climate Change	Markus Groth, Helmholtz-Zentrum Geesthacht Climate Service Center Germany (GERICS), Germany
138	Sector Coupling Electricity-Transport Dual Fuel Vehicles As Virtual Power Storage Systems	Reinhard Pfaffenbach, n/a, Germany
161	Power-to-gas in a future Nordic District Heating System	Jussi Pekka Ikäheimo, VTT Technical Research Centre of Finland, Finland
225	Nachhaltigkeit der Energiewende	Johannes Cloerkes, SV-Büro Cloerkes, Germany
315	Increased Stability of Pore Confined Pt-Co Electrocatalyst for PEMFC	Enrico Pizzutilo, Max-Planck-Institut für Eisenforschung, Germany
<b>Flexibility Options</b>		
112	Potential Of Wastewater Treatment Plants For Long-term-storage Options Via Power-to-Gas	Michael Schäfer, TU Kaiserslautern, Germany
279	Finance Models for Rural Electrification from Renewable Energy Schemes	Samuel Tita Wara, Covenant University, Nigeria
308	Politicised Nexus Thinking in Practice: Integrating Urban Utilities into Energy Markets	Frank Hüesker, TU Kaiserslautern, Germany
321	Green CO <sub>2</sub> as a Feedstock for Power to Gas Energy Storage	Johannes Schaffert, Gas- und Wärme-Institut Essen, Germany
<b>Framework Conditions</b>		
159	Renewable Energy Financial Perspectives in Southern Europe	Georgios Sainis, German Aerospace Center (DLR), Institute of Solar Research, Germany

200	Market Opportunities and Regulatory Framework Condition for Stationary Battery Storage Systems in Germany	Mira Klausen, Leuphana University of Lüneburg, Germany
<b>Innovative Products</b>		
117	Thermal Mass Improvement Of Lightweight Concrete With Modified Aggregates	Araceli Gálvez Moreno, Acciona Infraestructuras, Spain
134	Smart Chap, das clevere HEMS von Sharp: Solarenergie intelligent nutzen	Ralf Roekendorf, SHARP Electronics GmbH, Germany
190	Compact HyGenStoPlants (CHGSP)	Josep Puig i Boix, EUROSOLAR Spain, Spain
256	Innovative Combined Process for the CO2 Conversion Into Fuels And Chemicals	Lenard-Istvan Csepei, Fraunhofer IGB, Germany
304	Approaches for the Analysis of Innovation Networks Regarding Energy Storage Technologies	Bert Droste-Franke, European Academy of Technology and Innovation Assessment GmbH
<b>Involved Actors</b>		
147	Social Dimension of Renewable Energy Research Through Responsible Research and Innovation Looking Glass	Luisa F. Cabeza, University of Lleida, Spain
208	Model for Assessing the Market and Grid Oriented Operation of Distributed Energy	Tom Kulms, RWTH Aachen University, Germany
278	Paradigms for Sustainable and Clean Energy Accessibility for Sub-Saharan Africa	Samuel Tita Wara, Covenant University, Nigeria
<b>Power-to-X</b>		
284	Improved Membrane Electrode Assemblies And Lifetime Estimation for PEM Water Electrolysis	Maximilian Möckl, ZAE Bayern, Germany
314	Electrical Heat Pump And Thermal Energy Storage Combination For Shifting Electrical Surplus Energy	Sebastian Kuboth, Universität Bayreuth, Germany
276	Techno-Economic Analysis of Various Power-to-X Concepts for the Integration of CO2-based Synthesis	Sebastian Stiebel, Fraunhofer UMSICHT, Germany
<b>PV Home Storage</b>		
232	Adaptive Predictive Energy Management Concept for PV Storage Systems	Michael Böttiger, TU Dresden, Germany
238	Reducing Cut-Off Energy of PV-BESS by Using Forecast Based Operation Strategies	Georg Angenendt, ISEA RWTH Aachen University, Germany
270	Intermediate Results of Monitoring of PV Home Storage Systems	Philipp Rechberger, University of Applied Sciences Upper Austria - Research & Development, Austria
324	Model-Based Performance Evaluation of Grid-Connected PV-Battery Systems	Johannes Weniger, HTW Berlin, Germany
<b>Thermal Energy Storage</b>		
108	Numerical Investigation of a Sodium Dual-Media Thermal Energy Storage System for CSP	Klarissa Niedermeier, Karlsruhe Institute of Technology, Germany
116	Particle-Resolved CFD Simulation of Thermal Energy Storage in Rock Beds	Michael von der Heyde, Hamburg University of Technology, Germany
119	Packed Beds As Heat Storage: Modelling and Validation	Philipp Knödler, German Aerospace Center, Germany
122	Model For Describing The Thermodynamic Behavior Of Horizontal Packed Rock Bed Thermal Energy Storages	Marco Prenzel, Siemens AG Corporate Technology, Germany
128	Design and CFD Analysis of Al-Si 12 Alloy Based Latent Heat Storage System for Direct Steam Generation Solar Power Plants	P. Srinivasan, Birla Institute of Technology and Science, India
140	High Power Latent Heat Storages With 3D Wire Structures – Numerical Evaluation Of Phase Change Behavior	Andre Schlott, Fraunhofer IFAM , Germany
141	Control of Corrosive Impurities in Molten Chloride Salt Mixtures for Thermal Energy Storage	Wenjin Ding, German Aerospace Center, Germany
146	Development Of Industrial PCM Heat Storage Prototype	H.A. Zondag, Energy Research Centre of the Netherlands, Netherlands
156	Ageing and Compatibility Tests of Thermal Oils for Use in Thermocline Storage Systems	Sophie Molina, LaTEP- University of Pau & Pays l'Adour, France
171	Simulation of a High Temperature Thermal Energy Storage System	P. Srinivasan, Birla Institute of Technology and Science, India
189	Erythritol, Glycerol and Olive Oil as Renewable Safe and Cost-Effective PCMs	Saman Gunasekara, Royal Institute of Technology, Sweden
205	Development of A Gas-Particle Heat Exchanger for High Temperature Storage Systems	Cristiano Boura, Solar-Institut Jülich, Germany
220	Quantification of Storage Capacities And Induced Effects for High-Temperature Geological Heat Storage	Sebastian Bauer, Christian-Albrechts-University Kiel, Germany
243	Investigations of Stratification in a Mantle Tank and a Tank with Flexible Inlet Stratifier	Janne Dragsted, Technical University of Denmark, Denmark
247	Partly Adiabatic Process Management of Compressed Air Energy Storage Power Plants for Storing Renewable Energy	Michael Krüger, German Aerospace Center, Germany

267	Thermophysical Properties of Sodium Acetate Trihydrate Composites as Heat Storage Material	Mark Dannemand, Technical University of Denmark, Denmark
309	Influence of the Emulsifier Concentration on the Viscosity of Paraffin Wax Phase Change Slurries	Michael Biedenbach, Fraunhofer ISE, Germany
328	Experimental Investigation of The Honigmann-Process for Thermo-Chemical Energy Storage and Conversion	Elisabeth Thiele, TU Berlin, Germany
